### LOCATION

Deerfield – Madbury, NH

### THE CHALLENGE

Complete a Survey of a 13 mile transmission line corridor for easement baseline monumentation. PSNH requested that their easement limits be reestablished and that a corridor baseline be monumented for permanent control.

### THE RESULTS

A control network for the project was established on the SPC83 NH grid projection with GPS. Research documents along the corridor were gathered and the corridor was then surveyed for evidence of property lines and easement limits. Record and field evidence were reconciled to reestablish the L175 corridor easement. A baseline for the corridor was monumented at angle points and approximate 2,000' intervals. Record plans were generated documenting the survey and baseline monuments.
